Ilton Andrew

Senior Software Engineer II

iltonandrew.com.br iltonandrew@gmail.com github.com/iltonandrew linkedin.com/in/ilton-andrew

Senior Software Engineer at McKinsey & Company / QuantumBlack. Previously Head of Software Engineering at Media Hero, where I built the product and the engineering team from the first three people to a company of about 90. Full-stack, cloud and technical leadership background.

EXPERIENCE

Senior Software Engineer II · McKinsey & Company · QuantumBlack, AI by McKinsey
September 2026 – Present · São Paulo, Brazil

Software engineer on the technology side of QuantumBlack, AI by McKinsey, building software for client engagements where technology is the means rather than the end. Same engineering work, at a larger scale and across a wider variety of problems.

TypeScript, Python, Cloud, AI

Head of Software Engineering · Media Hero
February 2023 – September 2026 · São Paulo, Brazil

Joined as one of the first three people and left with the company at around 90, with an engineering team that runs on its own and a product that held up through every growth turn. Built the data platform from the first lines of code: a Next.js + tRPC + Prisma platform delivered in 9 months, CI/CD and infrastructure with Terraform on GCP, a cohesive UI with Ant Design, shadcn and Tailwind, product analytics with PostHog. Made the first hires, set up the engineering processes, and launched the company's first marketing site on Webflow.

Next.js, tRPC, Prisma, Terraform, GCP, PostHog

Treasury Software Engineer · XP Inc.
August 2022 – February 2023 · São Paulo, Brazil

Built tools that improved workflow reliability and centralized data across multiple systems and databases. Delivered a real-time web dashboard for financial data, gathering direct analyst feedback to prioritize features that increased productivity and decision-making confidence.

Python, Go, SQL, Real-time Data

Software Engineer · Pipefy
January 2021 – July 2022 · São Paulo, Brazil

Graduated from the Young Guns Tech trainee program, rotating across teams to learn the product and customers. Shipped features such as Share Inbox, Form Hub, and Guest Portal. On the PLG team, improved conversion by enhancing usability and FTUE, running iterative A/B tests with design.

TypeScript, React, GraphQL, Ruby on Rails, Elixir

IT Projects Summer Intern · XP Asset Management
December 2019 – February 2020 · São Paulo, Brazil

On the Project Squad, built a Django portal to monitor fund performance, integrated Power BI dashboards, and implemented automations that improved team efficiency. Helped manage and validate platform updates.

Python, Django, Power BI, SQL

EDUCATION

Escola Politécnica da Universidade de São Paulo
B.Sc. in Electrical Engineering, minor in Computer Engineering
February 2018 – December 2022

Active in extension programs, especially the junior enterprise Poli Júnior and the Amigos da Poli endowment fund.

CERTIFICATIONS

Associate Cloud Engineer
Google Cloud · December 2024 (valid until December 2027)

Microsoft Learn Student Ambassador
Microsoft · October 2021

SKILLS

Languages: TypeScript, JavaScript, Python, Go, SQL

Frontend: React, Next.js, Astro, Tailwind CSS, shadcn/ui

Backend: Node.js, tRPC, Prisma, Django, GraphQL, Ruby on Rails, Elixir

Cloud: GCP, Terraform, CI/CD, Vercel, PostgreSQL

Practices: System design, technical leadership, product analytics, A/B testing

LANGUAGES

Portuguese — native

English — fluent

AWARDS

Visagio Hackathon — 1st place. WhatsApp chatbot in Node.js for fake-news verification.

Tech Volunteer · Amigos da Poli

September 2019 – December 2020 · São Paulo, Brazil

Built the 2020 Project Notice site with Angular and launched a new brand website with a React/Gatsby CMS. The new site increased conversions and donations; during the Month of Giving, created a real-time donations dashboard that gamified engagement and boosted participation.

Angular, React, Gatsby, CMS

Software Engineer · Poli Júnior

November 2018 – March 2021 · São Paulo, Brazil

Delivered custom systems for clients using Django, React, React Native, and Node.js. Introduced and trained the team on modern web technologies and software architecture practices. Co-organized Workshop Integrativo, Latin America's largest recruitment fair; built a Django information system to digitize and centralize fair data and created a WhatsApp chatbot that increased conversions and traffic.

Python, Django, Node.js, React, React Native
